Module Ten A Brief Outline 10

Important Terms and Concepts 11
 Advisor’s Preface 11
 Educational Objectives. 11
 Student Assignment 11

Clinical Sports Nutrition 12

The Definition of Medicine 13
 The Absence of Physical
 Conditioning. 13
 Health is More than the Absence
 of Disease 14
 State of Health Must Be Determined. 15
 Vertical Jump Test Procedure 15

**Recommended Analytical
 Procedures 17**

Collection of Data 18
 Assessment Procedure Outline. 18
 Blood Chemistry Assessment Markers . 19

Client Objectives and Lifestyle Strategy. 20
 Detailed Description of Analytical
 Procedures. 20
 Fitness Assessment 20
 Body & Blood Type 21
 Hair Analysis 22
 Blood Chemistry 23
 ORAC Test 23
 Metabolic Status and Protein
 Chemistry 23
 Thyroid Panel Assessment 23
 Urine & Saliva pH. 23
 Thyroid Temperature Home Test 23
 Chiropractic Exam. 24
 Exercise Protocol Review. 24
 Detailed Dietary Analysis. 24
 Medication, Recreational Drugs,
 Doping Agents & Supplements 25

Dietary Analysis 26

Client Feedback Essential. 26
 Food Selection Must Coincide
 with Science. 27
 Getting the Message Across. 28
 Counting Calories is Passé 28

Fitness Testing. 30

A Fitness Test Puts an End to
 all Speculation 30
 Self-Testing for Fitness. 32
 1.5-Mile Run Test 32
 40-Yard Sprint Test 33
 Bench Press Test 33
 Push-Up Test 33
 Sit-and-Reach Test. 33
