Module Two

Energy & Cellular Metabolism 2

Course Instructions	3
PSN Video Knowledge Updates	3
Student Study Tips & Habits	3
Recommended Listening	3
Recommended Reading	4
Student Self-Test Questions	4
CSNA Masters Program	4
CSNA Master Teacher Program	4
Advisor's Preface	5
Credits	7
Table of Contents	8

Module Two A Brief Outline 10

Energy and Cellular Metabolism	10
Important Terms and Concepts	11
Educational Objectives	12
Student Questions & Support	12

Energy 13

Energy: The capacity to do Work	14
Thermodynamics	15
Kinetic, Potential and Activation Energy	16
Calories	17
VO ₂ max, METs and RMR	17
Motivation = Energy	19
Motivation Tip	20
Photosynthesis and Respiration	21
Adenosine Triphosphate	22
Metabolism – Change is Necessary	25
Three Phases of Catabolism	26
Mass Action, Enzymes and Cofactors	26
Enzyme Mediation	27
Enzyme Induction and Enzyme Repression	28

The Discovery of Vitamins 31

Fat Soluble Vitamins	32
Water Soluble Vitamins	32
Antioxidant Role of Vitamins	33
Common Free Radicals	34
Measuring Free Radical Activity	34
Minerals	38
Macro Minerals	38
Micro Minerals	38
Trace Minerals	40
Toxic Heavy Metals	40

Cell Structure 41

History of the Cell	42
Human Genome Project	42
Cellular Components and Structure	43
The Nucleus	43
Cytoplasmic Organelles	44
Ribosomes	44
Endoplasmic Reticulum	44
Golgi Complex	44
Lysosomes	44
Peroxisomes	45
Mitochondria	45
The Cytoskeleton	47
Centrosome and Centrioles	47
Flagella and Cilia	47
Cell Inclusions	47
Chemical Constituents of the Cell	48

Organic Compounds 49

Protein	49
Essential Amino Acids	50
Limiting Amino Acids	51
Denaturation of Protein	53
Protein Metabolism	53
Nitrogen Balance	5

Protein Quality	58
Carbohydrates	60
Glycogen	62
Muscle Glycogen	
Supercompensation	65
The Importance of Fiber	66
Mucopolysaccharides	67
Carbohydrate Metabolism	68
Glycolysis.	69
Lactic Acid:Friend or Foe?	71
The Lactic Shuttle	71
More on Lactic Acid	72
Nutrients which Improve Lactic Acid	
Metabolism	72
The Krebs Cycle	73
Oxidation-Reduction Reactions	73
The Electron Transport Chain	74
The Role of ATP	74
Oxidative Phosphorylation.	75
Substrate Phosphorylation	75
The Glycemic Index of	
Carbohydrates	75
Glycemic Load.	78
Glycemic Index Charts.	79
Carbohydrate Density	80
Lipids	81
Triglycerides	83
Eicosanoids	84
Phospholipids	86
Steroids	86
Lipid Metabolism.	89
Intramuscular Fat.	89
Lipid Anabolism	90
Fatty Acid Catabolism	91
Glycerol Catabolism.	91
How Exercise Improves	
Fat Oxidation	92
Ketones, Ketosis and	
the Ketogenic Diet	92
Nucleic Acids.	95
Inheritance	97
Genetic Response to Exercise.	97

Inorganic Compounds 98

Alkaline Food: Grossly	
Underestimated	100
Acid/Alkaline Balance	102
Acid Forming Foods	103
Alkaline Forming Foods.	104
Summary	105

Points to Remember 106

CHI Equation for Health	107
Student Assignment.	107
Student Self-Test Questions	108

References 112

Education 121

Suggested Reading.	122
The Cory Holly Series	123

Module Three A Brief Outline 124

The Primary Building Blocks	124
---------------------------------------	-----

Additional Articles & Topics

Mutant 97

Protocol for Achievement 105

Equation for Health 107

$$H = (nf)^2$$
